

IPitomy IP PBX

Set Time & Date

The IPitomy IP PBX is designed to set the time automatically using network time servers over an Internet connection. If this process fails, use the following procedure:

1.	Log in to the IP PBX using a web browser using the IP address, user name, and password Amtel South provides you. (xxx.xxx.xxx.ippbx)	ADMIN LOGIN User Name: pbxadmin Password: ••••••••••••••••••••••••••••••••••••
2.	Navigate to PBX Setup > General. On the General page, scroll down to Time Settings.	 ✓ PBX Setup Chat Database Email FTP Feature Codes General Mobile Music On Hold
3.	Ensure the Network Time Service window shows the time server information in this screen shot:	Time Settings Current System Time: Thu Apr 06, 2017 1:43:12 P Timezone: US/Eastern Network Time Server: time.nist.gov
4.	Click the Synchronize button. The Current System Time should update to the correct Date & Time. If it does not, contact Amtel South to arrange a service visit.	Synchronize
5.	If all phones do not update to the current time, the system may need to be rebooted for the update to take effect.
